APPENDIX A: PROJECT OVERVIEW and SCOPE of SERVICES

1. PROJECT OVERVIEW

The purpose of the work is to enhance the Burnaby Hospital (BH) by creating a new dedicated Mental Health and Substance Use (MHSU) zone in the Emergency Department (ED) on level 3. Additionally, it proposes the development of a Community Health Services Centre near the hospital's lower level 1 main entrance.

2. PROJECT INFORMATION

2.1 Project Scope

The priority for the Project is for the fit-out of the new MHSU on level 3, adjacent to the Emergency Department by December 2019 (**Package #1**). The work will require for the relocation of existing Patient Registration be relocated to level 1 main entrance area. Associated renovations and minor renovations within that area will take place before the decanting can occur. Other associated phases of work will be required to consolidate the Community Health Services on level 1. These various outpatient services such as Medical Day unit (MDU), Neuro-diagnostics and Neurology, and Outpatient Parenteral Antimicrobial Therapy (OPAT) are to be co-located on level 1 (**Package #2**). Completion of this package is to complete or June 2020.

The displaced services from Level 3 are accommodated on Level 1 in vacant and underutilized space currently occupied by Health Information Management and Laboratory Services. By moving historic patient health record files off site and improved space utilization strategies, significant space can be liberated to accommodate Community Health Services. The relocation of Community Health Services in turn, opens up inpatient space within the existing Nursing Tower building. This realignment of space to services supports the future plan to upgrade/improve the existing acute in-patient areas. Providing added value, the changes proposed for Level 1 of the Support Facilities Building will also enable patient/visitor improvements to the eastern, main public entrance and co-location of a number of key, inter-related community/public services.

In summary, the project scope includes an approximately **1,170 CGSM** of renovated area (approximately **240 CGSM on Level 3 and approximately 930 CGSM on Level 1**). A full functional program has been completed.

The project team will be developing two or more key project packages for tender, per project schedule noted below in 2.3. These packages may proceed on the basis of design-bid-build or CM pending on the method of project delivery that best meets the required timeframes. The project team will initiate the project works by completing a full site investigation of existing building conditions and infrastructure/services' report, prior to the design process. The team will be engaging the design process in an integrated design approach to ascertain and coordinate the necessary project information in completing a comprehensive package prior to QS estimation and tendering. Upon construction completion of the project work(s), O&M manuals, warranties and record dwgs will be provided to the owner for their records.

For consultant reference, a partial key excerpt of Business Plan (pgs 10 to 25) has been attached to the RFP for your review and understanding.
