### Description

This project is adopting the **Design** and Build scheme, which involves a 5-Storey Building which utilizes the whole lot area and considers mandatory set-backs. The Building will adopt the Green Architecture **Design** to create energy efficient and sustainable structure. Buildings are responsible for large consumption of energy, electricity, water and material. Green buildings aim to reduce the environmental impact of buildings and minimizing the electricity consumption. One of the methods to achieve these goals is by using the natural or mechanical ventilation, or a combination of them instead of traditional air conditioning systems that consume a lot of energy.

Approved Budget for the **Design** and Build Contract: PhP 227,900,000.00

Fund Source: SB2-2019 (1011-8-5-07-04-010-10-2019)

Contract Period: 300 Calendar Days [10 Months]

**Design** Preparation: 60 Calendar Days [2 Months]

Construction: 240 Calendar Days [8 Months]
